PATIENT CARE

A practical reappraisal of corticosteroids

When should steroids be your first choice? Your last resort? When should you select an oral, an injectable or a topical? When are steroids absolutely forbidden? This article, based on the literature and on information provided by a panel of specialists experienced in the use of steroids, will provide helpful guidelines for using ACTH and the glucocorticosteroids in daily practice. You'll also find summary charts on indicated uses, products, dosages, side effects, etc.
